Evaluation and Monitoring

As part of our commitment to ensuring the effectiveness of the training program, participants will be required to complete a survey at the beginning and end of the training. The purpose of these surveys is to assess the participants' knowledge, skills, and satisfaction with the course content and delivery. The information gathered from these surveys will be used to improve future iterations of the training and measure the impact of the program. Additionally, approximately six months after the completion of the course, participants and their employers may be invited to participate in follow-up interviews. These interviews aim to gather feedback on the application of the acquired knowledge and skills in the workplace.
